***Response to Arguments***

Applicant's arguments filed 9/4/02 have been fully considered but they are not persuasive.

Applicants state Bachand et al. lacks the claimed elongated hollow housing, test member positioned within the housing and an elongated handle.

Bachand et al. illustrates in figure 4 an elongated housing having hollow portions containing test members (21,21') within the housing's hollow portion and elongated tether(33) being pulled through a hollow portion of the housing expressing the sample to fluid chamber(26,26') which are adjacent to the test members(21,21'). All of the elements taught by Bachand et al. are within the taught housing.
